

Product overview

Activities

Aminola B.V. is a specialist in the import and export, production and distribution of high-value vegetable ingredients for the international petfood and animal feed industry. Our expertise relies mainly in (organic) vegetable proteins to replace resource-scarce and unsustainable animal-based proteins. Our portfolio also includes a wide range of plant-based carbohydrates such as flours and starches in native or pregelatinized form. We are continuously developing our portfolio. Are you looking for a vegetable ingredient which is not listed? Please contact us.
